NOTES ON STATISTICS

1. Symbols used in tables

- . . not available
- nil or negligible.

2. Sources of Statistics

Official national publications and Commonwealth Secretariat records and estimates except in the case of Tables I and VII which are based mainly on data published in International Financial Statistics by the International Monetary Fund, and Table III which draws upon UNCTAD sources.

3. Definition of area headings

Commonwealth. Self-governing members of the Commonwealth and associated and dependent territories, as at December 1973. External trade of the constituent parts is defined by the political boundaries; as far as possible the trade of Malaysia is shown net of intra-Malaysian trade; trade of the East African Customs Area is grossed up to give the trade of Kenya, Uganda and Tanzania separately.

European Economic Community (Eight): membership of the EEC as at December 1973 less Britain.

Eastern Europe: Soviet Union, Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Romania.

4. Definitions of commodity headings

The standard groups generally used in the tables of commodity imports into countries cover the following items as defined under the Standard International Trade Classification (Revised); Food (S.I.T.C.0); Beverages and tobacco (S.I.T.C.1); Basic materials and base metals (S.I.T.C.2, 4, 67 and 68); Mineral fuels and lubricants (S.I.T.C.3); Machinery and transport equipment (S.I.T.C.7); Other manufactures (S.I.T.C.5, 8 and 6, less 67 and 68).

5. Period of trade

Calendar years unless otherwise stated. Statistics for certain countries have been adjusted as necessary from financial to calendar years where the figures are included in Commonwealth totals for calendar years. All 1973 data are provisional.

6. System of trade

Exports usually refer to total exports, which are domestic exports plus re-exports. Direct transit trade, consisting of goods entering the national territory for the purpose of passing to some other country, is usually excluded from the

figures of both exports and imports. Imports and exports are normally recorded at the point at which goods enter into or pass beyond the control of the national government. These are known as "General Trade" statistics.

7. Valuation of trade

In the case of most countries, exports are valued f.o.b. and imports c.i.f. Imports into Australia, Canada, New Zealand and Zambia are valued f.o.b. Exports from a number of countries are valued f.o.b. point of despatch: in the case Canada this valuation approximates about 95 per cent of the normally accepted definition of f.o.b. value.

8. Coverage of trade

Figures are for merchandise trade only, including trade on government account and postal trade. Gold, in the form of coin, bullion, unworked gold ores and partly worked gold, is excluded and, wherever practicable, settlers' effects, tourist purchases, ships' and aircraft stores and bunkers are also excluded. Most countries exclude, from their export and import statistics, stores and equipment for armed forces and goods for diplomatic missions.
