NOTES ON STATISTICS

GENERAL

1. *Symbols used in tables*

- . . not available
- nil or negligible

2. *Sources of Statistics*

Official national publications except in the case of the table on world trade by major areas which is based mainly on data published in International Financial Statistics by the International Monetary Fund.

3. *Definition of area headings*

Commonwealth. Self-governing members of the Commonwealth and associated and dependent territories, as at December 1972. External trade of the constituent parts is defined by the political boundaries; as far as possible the trade of Malaysia is shown net of intra-Malaysian trade; trade of the East African Customs Area is grossed up to give the trade of Kenya, Uganda and Tanzania separately.

European Economic Community: Membership as at December 1972. Associated overseas territories and associate members are not included.

Eastern Europe: Soviet Union, Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Romania.

4. *Definitions of commodity headings*

The standard groups generally used in the tables of commodity imports into countries cover the following items as defined under the Standard International Trade Classification (Revised): Food (S.I.T.C. 0); Beverages and tobacco (S.I.T.C. 1); Basic materials and base metals (S.I.T.C. 2, 4, 67 and 68); Mineral fuels and lubricants (S.I.T.C. 3); Machinery and transport equipment (S.I.T.C. 7); Other manufactures (S.I.T.C. 5, 8, and 6, less 67 and 68).

5. *Period of trade*

Calendar years unless otherwise stated. Statistics for certain countries have been adjusted as necessary from financial to calendar years where the figures are included in Commonwealth totals for calendar years. All 1972 data are provisional.

6. *System of trade*

Exports usually refer to total exports, which are domestic exports plus re-exports. Direct transit trade, consisting of goods entering the national territory for the purpose of passing to some other country, is usually excluded from the figures of both exports and imports. Imports and exports are normally recorded at the point at which goods enter into or pass beyond the control of the national government. These are known as "General Trade" statistics.

7. *Valuation of trade*

Unless otherwise stated in the Country Notes below, exports are valued f.o.b. and imports c.i.f.

8. *Coverage of trade*

Figures are for merchandise trade only, including trade on government account and postal trade. Gold, in the form of coin, bullion, unworked gold ores and partly worked gold, is excluded and, wherever practicable, settlers' effects, tourist purchases, ships' and aircraft stores and bunkers are also excluded. Most countries exclude, from their export and import statistics, stores and equipment for armed forces and goods for diplomatic missions.

COUNTRY NOTES

Australia

Exports are recorded at transaction value f.o.b. with a theoretical value for goods shipped on consignment.

Imports are recorded at transaction value f.o.b. or domestic value f.o.b. whichever is the higher. "Domestic value" is the value of similar goods on sale for cash for domestic consumption in the country of export.

Exports exclude uranium and certain materials for inter-governmental defence projects.

Bangladesh

The figures for the external trade of Bangladesh, other than with Pakistan, are those collected for East Pakistan; import valuation is c.i.f. and export valuation f.o.b.

The statistics for trade with Pakistan are derived from the *Monthly Statistical Bulletin of Bangladesh*.

Britain

Exports exclude:

- (1) used clothing and household goods exported by charitable organisations;
- (2) aircraft, other than newly constructed.

Imports exclude:

- (1) materials such as uranium ore and concentrates;
- (2) aircraft, other than newly constructed. Progress payments for U.S. military aircraft are published in lieu of the value of actual imports.

Canada

Exports are normally valued f.o.b. point of consignment in Canada. This valuation approximates about 95 per cent of the normally accepted definition of f.o.b. value.

Imports are normally valued f.o.b. point of consignment to Canada and the statistical value of imports is usually the value as determined for Customs duty purposes. This valuation is equivalent to just over 90 per cent of normal c.i.f. value.

Imports exclude:

- (1) ships of British construction and registry for use in Canada;
- (2) ships purchased for use in foreign trade.

Ghana

Exports and imports exclude ships and aircraft purchased or sold abroad and not manifested as cargo.

Kenya, Tanzania, Uganda

Direct imports are goods imported from outside the East African Customs Area and entered for consumption or warehousing in either the country of actual import or in either or both of the other two countries.

Net imports are direct imports, as defined above, to which have been added or from which have been deducted imports from outside East Africa subsequently transferred interterritorially. The valuation of these adjustments is c.i.f. point of entry to the East African Customs Area. Both direct and net imports include goods entered for consumption or warehousing which are subsequently re-exported outside the East African Customs Area.

Domestic exports as shown in this report include domestic exports to the other two East African countries as well as outside East Africa.

Exports include re-exports of non-East African goods to points outside East Africa, but exclude trade in non-East African goods between East African countries. This trade is mainly in goods destined for Uganda and northern parts of Tanzania shipped via Mombasa. It is measured by the difference in value between direct and net imports of Kenya.

Exports by parcel post are excluded but imports under this heading are included.

Malawi

Exports and re-exports are valued f.o.r. place of despatch.

For 1968 and 1969 imports are valued f.o.b. or f.o.r. place of despatch; for 1970–72 they are valued c.i.f.

New Zealand

Exports f.o.b.; detailed import statistics are valued at the current domestic value in the country of export (c.d.v.) which is the basis of most of the New Zealand import statistics in this publication.

Exports exclude:

- (1) goods shipped overseas by relief organisations;
- (2) ships on their own bottoms.

Singapore

Exports and imports include transit trade with West Malaysia.

In regard to trade with West Malaysia, exports from Singapore are valued c.i.f. West Malaysia, and imports into Singapore are valued f.o.b. West Malaysia.

Zambia

Exports and re-exports are valued f.o.r. place of despatch.

Imports are valued f.o.b. or f.o.r. place of despatch.
