Note

The published literature on in-service teacher training, especially in the developing countries, is very scanty. It is also not easy to come by as most of it has appeared in the form of articles in such journals as:

Teacher Education in New Countries
(OUP - no longer published)

English Language Teaching (OUP)

Overseas Challenge (ODM, London)

Educational Development International
(British Council)

Science Education Newsletter
(British Council)

A good deal also is available only in unpublished project reports, some of which have been invaluable in the compilation of certain of the Case Studies in Part 2.

Project
materials
and
information

Printed and audio-visual materials relating to particular in-service projects are normally only available direct from the Agency (Ministry, University etc.) concerned in the country of origin.

A Curriculum Information Centre (for overseas) now operates, however, in the British Council at Tavistock House South, Tavistock Square, London, WC1. Here materials from many countries can be examined and information supplied by post in response to specific inquiries.
